INTRODUCTION

The Sunseeker 28 Metre Yacht “DIABLO” is without doubt one of the most unique Sunseeker’s ever built. This highly successful model from the British Shipyard blew the competition away when the first hull of the series ran off the production line in 2012. Her unique hull design allowed for expansive height throughout the vessel. None more so than in the lower deck full beam master cabin.

The moment you step on-board DIABLO her condition will astound you. Meticulously maintained and seldom used by her current owner this is an opportunity to acquire an “as new, turnkey” vessel at a fraction of the new build price.

DIABLO boasts a highly unique interior finished in high gloss black and deep red lacquer. The benefit of the lacquer finish over traditional walnut or oak materials is the ability to replace and change areas of the vessel without the risk of colour matching issues. Therefore, if the deep red lacquer is not to your taste then this can be modified and changed very easily.

DIABLO boasts 4 cabins on her lower deck. Her full beam master is capacious (as can be seen and experienced in our 360” Virtual Tour) and boasts a vanity area to port side, relaxing sofa to starboard, walk in wardrobe as well as en-suite bathroom. The forward VIP cabin features a private access independent from the lower deck lobby. A unique feature on the Sunseeker 28 Metre Yacht and one that creates a nice boundary between the Master Cabin and the VIP Cabin. There are a further two cabins on the lower deck, a Double Guest Cabin and a Twin Guest Cabin, both of which are en-suite.

The Main Deck on DIABLO benefits from panoramic glass windows in the saloon as well as a sliding patio door and hydraulic balcony on the starboard side. The Saloon features a free-standing dining area for up to 8 guests as well as a capacious seating and sofa area on the port side. The Galley features an opening side door for access to the port side deck, excellent not only when cooking but also for independent crew access to avoid them having to pass through the saloon. The Galley features an open breakfast bar that can be closed by her electric fixed partition should you wish for the crew to cook in privacy.

DIABLO

SUNSEEKER YACHT – DIABLO

The main deck helm is located forward of the unique bar area that the owner specified on this particular 28 Metre Yacht. To the portside of the helm is a crew/owner navigation/work station that provides privacy from the guests and an excellent viewing position whilst underway.

Perhaps one of the most striking and unique features on the Sunseeker 28 Metre Yacht is her forward bow area. The high sided hull design of the 28 Metre Yacht has allowed for the creating of a class leading open flat deck area forward. This area is without doubt one of the standout features of the Sunseeker 28 Metre Yacht. With fixed sunbathing to both port and starboard as well as a U-Shaped dining and seating area the bow section comfortably accommodates up to 12 guests across her various areas.

DIABLO boasts a stunning glass fronted Jacuzzi on her flybridge as well as a large bar area and sun pads both forward and stern. The flybridge layout on DIABLO is quite frankly stunning. DIABLO is one of very few Sunseeker 28 Metre Yachts to boast a crane on her flybridge, perfect for accommodating a jet ski whilst the tender remains on her hydraulic rise and fall bathing platform.

The Carbon Fibre Hard Top features a retractable centre section allowing the flybridge to bath in sunshine on those warm summer days. With her Fin Stabilizer System DIABLO is extremely comfortable whilst at anchor or underway ensuring that even the weakest sea legs stay firmly on the ground.
